

Kiryl Arlouski

Senior Javascript Developer

Warsaw, Poland · [LinkedIn](#) · k.smolniy@gmail.com

Professional Summary

Senior Javascript Developer with 8+ years of experience building applications using **React**, **Next.js**, **Node.js** and **TypeScript**. Who enjoy making things that is working since a kid. Experienced in building maintainable systems with strong focus on performance, clean code and great user experience. Skilled in leading teams, driving innovation, and delivering high-impact solutions in startups and enterprises.

Core Skills

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React, Next.js, React Native, Redux, Zustand, SASS/SCSS, styled-components, Accessibility (WCAG)

Backend: Node.js, Nest.js, gRPC, OpenApi, REST, GraphQL, Kafka

Databases: PostgreSQL, MongoDB, Redis, TypeORM, Mongoose

Testing & Quality Tools: Jest, Vitest, ESLint, Prettier

Architecture: Design Systems, Monorepo, Microservices, Microfrontends

Cloud & CI/CD: AWS S3, AWS EC2, AWS SQS, AWS RDS, AWS App Runner, AWS CloudFront, Vercel, Github Actions

Tooling: Webpack, Vite, Nx, Git, Storybook

Performance & Quality: Web Performance Optimization, Code Splitting, Lazy Loading, Lighthouse Optimization

Other Technologies & Tools: WebSockets, JWT

Professional Experience

EPAM Systems — Senior Frontend Developer

Nov 2022 – Present · Poland

- Develop scalable web applications using React and TypeScript in enterprise environments
- Design reusable UI components and contribute to shared design systems
- Optimize frontend performance through code splitting, lazy loading and bundle optimization
- Implement accessible user interfaces compliant with WCAG standards
- Participate in technical planning and backlog grooming with product teams
- Conduct code reviews and mentor junior developers
- Collaborate with backend engineers, QA and product teams in Agile environments

EPAM Systems — Frontend Engineer

Nov 2018 – Nov 2022 · Poland / Belarus

- Developed production UI features using React and modern JavaScript
- Built frontend functionality for large-scale web and mobile applications
- Improved performance through dependency optimization and bundle splitting
- Integrated frontend applications with REST and GraphQL APIs
- Enhanced accessibility of interfaces following WCAG standards
- Maintained high code quality through automated testing and code reviews

iTechArt Group — Frontend Engineer

Aug 2018 – Oct 2018 · Minsk, Belarus

- Developed UI components for a marketing automation platform using React
- Implemented new product features and supported legacy frontend code
- Collaborated with distributed teams in Agile workflows

Ultralab — Frontend Engineer

Jan 2018 – Jul 2018 · Minsk, Belarus

- Developed UI features for a digital advertising platform
- Implemented responsive interfaces using JavaScript, HTML and CSS
- Integrated frontend with backend APIs and participated in sprint planning

LWO (Light Well Organization) — Frontend Developer

Sep 2017 – Jan 2018 · Minsk, Belarus

- Developed single-page web applications interacting with REST APIs
- Implemented cross-browser compatible UI components
- Maintained and refactored existing frontend codebase

Selected Projects

Enterprise Web Banking Platform

Large-scale web banking platform aimed at improving digital customer experience and enabling faster release cycles for a major financial institution.

- Developed core web UI features using React and TypeScript
- Contributed to modernization of frontend architecture and reusable component libraries
- Optimized rendering and data fetching flows improving application responsiveness and perceived performance
- Collaborated with cross-functional teams (5–6 FE, 5–6 mobile, backend, QA, analysts) to support frequent product releases
- Supported platform used by millions of banking customers

Global Logistics Transportation Management System

Enterprise transportation management platform coordinating shipments across global logistics operations.

- Developed complex UI workflows for shipment lifecycle management using React and TypeScript
- Implemented reusable components and form workflows using modern validation and state management libraries
- Collaborated with distributed engineering teams including architects, DevOps and QA
- Contributed to scalable frontend architecture in Nx monorepo environment
- Supported logistics workflows coordinating shipments across multiple delivery stages (first-mile to last-mile)

Healthcare & Retail Digital Platform

Large enterprise platform improving digital access to healthcare services and consumer retail experience.

- Developed cross-platform mobile application features using React Native and GraphQL APIs
- Collaborated with backend teams on BFF contract design and API integration
- Delivered UI features and demos to client stakeholders in an Agile environment
- Improved frontend code quality through automated tests and code reviews

Languages

- English — Upper-Intermediate (B2+)
- Polish — Upper-Intermediate (B2)
- Russian — Native
- Belarusian — Native

Education

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Bachelor's degree - Computer Technologies (2017 – 2021)

BSUIR Affiliate "Minsk Radioengineering College"

Specialist Degree — Software Programming Technologies (2013 – 2017)
